Introduction

The blockchain introduced a new paradigm of distributed systems which will create an immense change to our digital life as we know it today. Unforgeable transactions can be done anonymously and nearly in real time.

There are two major ways of creating new blocks to validate and execute transactions. One is the so-called "Proof-of-Work" approach which is well known, e.g. from the Bitcoin blockchain. The drawback here is the need for massive computational power (the process called "mining") to accomplish transactions and ensure integrity. The other one is the so-called "Proof-of-Stake" approach. Instead of mining from the classical point of view, transactions will be done via the "trustworthiness of the collective" by simply holding coins in the wallet.

Cronos is a PoS masternode coin like Dash or PIVX (see technical details below). Cronos was made for improving the "ecosystem of masternodes" and to make it both, more user-friendly and safer to use.

The team behind Cronos aims to provide innovative tools for the "masternode ecosystem" you don't want to miss anymore.

The market

Currently, there are around 550 masternode coins, and this number is constantly increasing. A fast-growing market which needs solutions for different problems – the idea behind Cronos!

Some facts: (December 2018, Source: <https://masternodes.online>)

| | |
|---------------------|-------------------------------|
| Masternode-Coins: | ~550 |
| Masternodes online: | ~264,000 |
| 24h volume: | ~\$601,000,000 / ~141,000 BTC |
| DASH dominance: | ~62 % |

There are about 550 masternode projects which most of them have one problem in common – an unfair or insecure presale mechanism.

Our tool-chain based on Ethereum smart contracts will help customers/investors of new projects as well as coin developers to have a smooth and fair presale phase at the project startup. Especially the first days after launch can get pretty chaotic – this is precisely the point where Cronos can help.

The problem

If you already bought masternodes in the presale phase, you surely are aware of possible problems — different portals, untrustworthy people, strange presale auctions and a lot of scammers.

→ All in all a lot of variety and an unsatisfactory situation for both, masternode investors and developers that can cost a lot of energy, time and money.

The solution

All those problems need smart developers to tackle the challenges and to create solutions which are suitable for everyone. *This is the main idea behind Cronos!*

We provide a tool-chain for masternode presales to solve the stated problems transparently and concisely.

Take a look at some of the main features of our “Presale-Suite” software toolchain:

- Multi-platform
- Multi-device
- Cloud-based
- Smart contract based
- Fast and easy to use
- Integrated affiliate system (smart contract based as well)
- And many more...

Our comprehensive presale software is currently in an internal beta and development phase.

In Q1 / 2019 we are going to open source the software on GitHub. Our goal is to support masternode projects of the future.

Coin developers, please contact us for further details!

The potential

Due to the current market situation of around 264.000 online masternodes of about 550 different coins, a need for such tools is obvious. The amount of different coins increases nearly daily, and so we want to ensure people can get onboard on new coins and technologies much easier than before.

We are convinced that our tools will revolutionize the masternode community.

Technical facts

- Name: Cronos
- Abbreviation: CRS
- Max. supply: 55.000.000 CRS
- Pre-mined: 5.000.000 CRS
- Type: Proof of Stake
- Block time: 2 minutes
- Min. staking age: 1 hour
- Max. Block Size: 3 MB

Masternodes

- Collateral: 15.000 CRS
- Masternode / Coinstaking reward: 80% / 20%

Reward structure

| PoS Proof of Stake | |
|-----------------------|---------------|
| Block height | Reward |
| 1 - 20,000 | 250 CRS |
| 20,000 - 40,000 | 225 CRS |
| 40,000 - 60,000 | 202,5 CRS |
| 60,000 - 80,000 | 182,25 CRS |
| every 20k blocks | 10% reduction |

Roadmap

Quarter 4 | 2018

- Launch CRS coin
- Launch wallets
- Apollon Node-Builder listing
- Masternode presale
- Crypto-Bridge and Masternodes-Online listing
- Community building

Quarter 1 | 2019

- Release of the first software version
- Support for other coin projects to implement the presale solution
- Further community building, Marketing, Bounties, Airdrops...

Behind the scenes

The Cronos core team consists of experienced software developers who are “crypto freaks” since day one and gained a lot of knowledge about the market.

We came up with the idea since we thought it’s too insecure for people without enough experience. So, we decided to help the community by building tools that enable the access to the “economy of masternodes” for everybody.

Nice and handy solutions for simplifying things in the crypto world – this is us – this is Cronos!

Disclaimer

We advise all users to read the following notification thoroughly before participating in the CRS masternode sale. This notice applies to everybody who reads this document. Please note this notification may be changed or updated.

- The CRS coin is not a security. The purchasing of CRS coins does not present an exchange of cryptocurrencies or conventional currencies for any form of ordinary shares.
- The CRS coin is a utility coin which acts as a voucher for purchasing service and support for our open source software later on.
- The Seller and the Buyer of CRS coins are not entitled to any guaranteed form of dividend or anything comparable.
- This Whitepaper serves to provide information and is not a financial, investment or purchasing advice. Furthermore, this whitepaper does not replace any of it. Therefore, none of the content parts of the Whitepaper shall be considered an invitation or inducement to engage in any sort of investment activity.
- The buyer should carefully consider and evaluate all risks associated with cryptocurrencies, operations with them, masternode sales and respective business activities.
- We strongly recommend you to take advantage of independent financial and legal advice before engaging in any sort of business endeavor.

Risk Statement

No regulatory authority has examined or approved any of the information set out in this Whitepaper. No such action has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction. The publication, distribution or dissemination of our Whitepaper does not imply that the applicable laws of any jurisdiction, regulatory requirements, or rules have been complied. To the maximum extent permitted by the applicable laws, regulations and rules, the Seller and its affiliates and respective officers, employees or agents, in relation to the website (www.cronoscoin.online), CRS coins, Cronos products and services will not be liable for any damages of any kind, including, but not limited to, direct, consequential, incidental, special or indirect damages (including but not limited to lost profits, loss of revenue or third party loss whether foreseeable or otherwise, trading losses or damages that result from use or loss of use of the website, CRS coins, Cronos products and services). For the avoidance of doubt, the Seller expressly disclaims any and all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from: (i) reliance on any information contained in this document, (ii) any error, omission or inaccuracy in any such information, (iii) any action resulting therefrom, or (iv) usage or acquisition of Cronos products and services, available on the website and other electronic platforms. You confirm and agree that you are not purchasing CRS coins for purposes of investment, speculation for immediate resale or other financial

purposes. Some of the statements in the Whitepaper include forward-looking statements which reflect the Seller's current views with respect to execution roadmap, financial performance, business strategy and future plans, both with respect to the Seller and the sectors and industries where the Seller operates. Statements which include the words "expects", «plans», «believes», «projects», «anticipates», «will», «aims», «may», «would», «could», «continue» «going to» and similar statements are of a future or forward-looking nature. All forward-looking statements concern the matters that involve risks and uncertainties. Accordingly, there are or will be important factors that could cause the Sellers's actual results to differ significantly from those indicated in these statements. These factors include but are not limited to those described in T&C, which should be read before he purchase of CRS coins. Any forward-looking statements in the Whitepaper reflect the Seller's current views with respect to future events and are subject to these and other risks, uncertainties and assumptions relating to the Seller's operations, results of operations and growth strategy. These forward-looking statements are valid only on the date of the Whitepaper publication. The Buyer should specifically consider the factors identified in the Whitepaper and the T&C which could cause actual results to differ before making a purchase decision. No statement in the Whitepaper is intended as a profit forecast and no statement in the Whitepaper should be interpreted to mean that the earnings of the Seller for the current or future years would be as may be implied in the Whitepaper. None of the statements in the Whitepaper, (including but not limited to statements, which are of forward-looking nature, as described above) can result in any liabilities of the Seller towards the Buyer. The Buyer accepts, that the Seller is indemnified and held harmless by the Buyer with regards to any statement (including but not limited to statements, which are of forward-looking nature, as described above) in the Whitepaper.
